SUMMARY

Master's graduate in Electrical and Electronics Engineering specializing in control systems, industrial automation, electric vehicles, and computer vision. Experienced in BLDC motor control simulation, automation systems, and real-time vision-based applications using MATLAB/Simulink, Python, and OpenCV. Strong background in system modeling and engineering research with Erasmus international academic experience in Poland and Bulgaria. Interested in robotics, EV systems, and intelligent automation.

EDUCATION

Master's Degree

Giresun University

Electrical & Electronics Engineering

GPA: 3.72/4.00

2023 – 2025

Giresun, Turkey

Exchange Semester

South-West University "Neofit Rilski"

Electrical Engineering, Electronics and Automation

Erasmus Plus

02/2024 – 06/2024

Blagoevgrad, Bulgaria

Bachelor of Science (B.Sc.)

Giresun University

Electrical and Electronics Engineering

GPA: 3.40/4.00

2017 – 2021

Giresun, Turkey

Exchange Semester

Lublin University Of Technology

Electrical Engineering

Erasmus Plus

02/2020 – 07/2020

Lublin, Poland

SKILLS

Programming

- Python
- C
- SQL

AI & Computer Vision

- OpenCV
- Machine Learning

Embedded Systems & Industrial Automation

- PLC Programming (Ladder Logic)
- Industrial Automation Systems
- Microcontrollers (Arduino, ESP8266)

Electrical & Power Engineering

- Control Systems (PID Control)
- Electrical Machines (Motor Control)
- Power Electronics
- EV Systems (Motor Driver, Charging Station)

Engineering Design & Simulation

- MATLAB
- Simulink
- AutoCAD
- SolidWorks

Tools & Software

- MS Office
- Adobe Creative Cloud

PROJECTS

PID/FOPID Based Control of Bldc Motors Used In Electric Vehicles

10/2024 – 09/2025

Master's Thesis

- Developed a MATLAB/Simulink-based simulation model of a BLDC motor drive system for electric vehicle applications, focusing on closed-loop speed control dynamics.
- Designed and implemented multiple control strategies including PI, PID, PI fractional-order (FOPI), PID fractional-order (FOPID), and hybrid fractional-order (FOPI+FOPD) controllers for speed regulation.

- Evaluated system performance using standard control metrics (ISE, IAE, ITSE, ITAE), enabling quantitative comparison of tracking accuracy, stability, and transient response behavior across controller architectures.
- Conducted comparative analysis of classical and fractional-order control techniques, demonstrating improved robustness and enhanced speed regulation performance using the FOPI+FOPD configuration under simulated operating conditions.

Human Following Robot

09/2020 – 07/2021

Undergraduate Thesis

- Developed a vision-based autonomous mobile robot capable of human-following behavior using Python and OpenCV for real-time detection and tracking.
- Implemented real-time human detection and tracking algorithms using computer vision techniques on a camera-integrated robotic platform.
- Integrated NodeMCU ESP8266 microcontroller to enable wireless communication and embedded control of robotic motion.
- Designed and implemented navigation and decision-making logic to dynamically adjust robot movement based on target position and motion feedback.
- Performed system testing and performance tuning in dynamic environments to improve tracking stability and responsiveness under real-world conditions.

PROFESSIONAL EXPERIENCE

Intern

07/2019 – 08/2019

Famel Electronics

Konya, Turkey

- Supported installation, testing, and maintenance of automated door control systems, contributing to end-to-end deployment and commissioning processes.
- Assisted in troubleshooting electrical and sensor-based automation faults, improving system reliability and reducing downtime during field operations.
- Gained hands-on experience with industrial automation components including control circuits, sensors, and actuator-based systems in real-world environments.
- Participated in system validation and functional testing across multiple automated installations.

Interpreter

06/2022 – 06/2022

Euro Bangla Group

Dhaka, Bangladesh

- Provided real-time interpretation between Turkish, English, and Bangla in professional and technical communication settings.
- Facilitated multilingual coordination between engineering and operational teams, ensuring accurate information transfer during meetings and discussions.
- Supported cross-cultural communication in business operations, improving clarity and reducing miscommunication risks.

Receptionist

04/2026 – Present

Diamond City Hotel

Istanbul, Turkey

- Managed front desk operations including guest check-in/check-out, reservation handling, and customer communication in a high-traffic hospitality environment.
- Coordinated scheduling and administrative tasks, ensuring smooth daily operations and timely guest service delivery.
- Handled customer inquiries and issue resolution, maintaining service quality and operational efficiency.
